

Flammability Conformity Certificate

January 1, 2011

Dear Valued Customer:

As you may or may not be aware, the recently enacted Consumer Product Safety Improvement Act of 2008 ("CPSIA") requires manufacturers and importers to certify that the products they sell meet all applicable standards covered by Consumer Product Safety Act applicable to such products. Viva Cotton, LLC is committed to the utmost compliance with certification standards under the statute which are applicable to its products.

Under The Flammability Standard for apparel set forth in 16 C.F.R. Part 1610, garments made of fabrics weighing more than 2.6 ounces per square yard are EXEMPT from any flammability testing. Viva Cotton, LLC manufactures and sells blank shirts made of fabric weighing over 2.6 ounces per square yard.

Certification of the lead content of ink on any surface coating or phthalates content of any appliqué or decal is the responsibility of the embellisher.

If we manufacture merchandise bearing your trademark or brand, we will be required under the new rules to include your name and address as a "private labeler" on our certificate.

We encourage you to visit the CPSC website for additional information:

<http://www.cpsc.gov/about/cpsia.html>

Please feel free to contact us should you have any questions regarding the safety of our products. We will keep you posted of any changes in the CPSC's application of the rules as they are brought to Viva Cotton, LLC's attention.

Sincerely,
Viva Cotton
